## COMPANY PROFILE

Dear Colleagues & Partners/ Well-Wishers,

We are feeling very happy to introduce Shee Hari Export House with range of sanitaryware Products

Shree Hari Export House is a modernized international enterprise integrated with R&D, manufacturing, sales and service. We have a complete Sales Strategy and efficient sales team, applying brand strategy, setting up enterprise image, and being the Advocate and Pioneer in the field of world class sanitary ware.

Keep improving and striving for excellence is the core strategy to our quality requirement. The company is devoting itself to exploring deeper on global sanitary ware, so as to provide high-quality products and sincere, sophisticated service to the whole society and customers, to build up the better life for all humans.

### Manufacturing Facility

Our use of innovative manufacturing technologies means that we are able to create excellent quality sanitary ware products in the latest designs at extremely competitive prices.

From design to manufacturing, we only use the most technologically advanced materials and processes. This has ensured our position as market-leader and innovative creators of sanitary and bathroom wares.

### Quality

Our company has established cooperative relationship with foreign countries, that introduce advanced technology and management from Spain and Italy for reaching the international advanced standards of performance.

## PRODUCTION & QUALITY

### Raw Material

To make finest sanitary ware products it requires a quality and standard inspection of raw materials. We have made a standard quality bench mark to use raw material for making our finest iconic products.

With challenges in modern design we ensure that all raw material must go through complete quality procedure so it gives foundation of an excellent product. This brings out the true essence of sanitary ware products.

### Quality Procedures

In our production line our crafters follow all the quality procedure to ensure that our product becomes the center of attraction. With certain quality criteria our products are one of the best & preferred in the market.

A quality process with visual reference that contain the trace of craft and shape to memorize the iconic products and reinvent the theme of bath space design.

The right kind of quality service that's differentiate us from others Let our quality products exceed your expectations.

## ONE PIECE TOILET

### How It Work ?

In toilets, the P-trap and S-trap refer to the shape and orientation of the trap that connects the toilet bowl to the waste pipe.

A P-trap toilet has a trap that is shaped like a "P". It is a curved pipe that is designed to hold water and create a barrier between the toilet bowl and the waste pipe. The water in the P-trap prevents sewer gases from entering the room, as the gases are unable to flow back up through the trap. P-trap toilets are more common in modern construction and renovations, as they are more effective in preventing odors and are easier to maintain.

An S-trap toilet has a trap that is shaped like an "S". This type of trap commonly used in plumbing systems. S-trap toilets have a straight pipe that connects the toilet bowl to the waste pipe, and the trap is formed by a bend in the pipe just below the toilet bowl. While S-trap toilets can be easier to install in certain situations where the waste pipe is located in a different position than where the toilet will be placed. The bend in the trap allows for more flexibility in positioning the toilet, which can be useful in older buildings or in situations where the plumbing system is not easily adaptable.

In general, P-trap toilets are the preferred option due to their ease of maintenance, while S-trap toilets is a design that work effectively.

## WALL MOUNT TOILET

### How It Work ?

Common in European bathrooms, wall-mounted toilets started gaining popularity in the india as well and for good reason. There are numerous advantages to using them, both in terms of used space and practicality and design overall. But first let's discuss a few general details.

So what is a wall-hung toilet and what makes it special? Their main distinctive feature which differentiates them from floor-mount toilets is the fact that the water tank is concealed behind the wall. It still remains accessible through the flush plate opening but stays out of view or you can use flush valves as well which are directly connected to the main water line to the bathroom. The bowl is mounted to the wall and the plumbing is connected to the water tank inside the wall.

Wall Hung Toilets Comes with Quiet close seat, Quick Release, Easy to Clean, High-profile, concealed design makes cleaning easier and creates a sleek and smooth look.

In addition, the concealed water tank also keeps the bathroom simple and easier to coordinate with the rest of the home, if you've chosen a minimalist, contemporary design. It's a really great way of getting rid of big eyesores in this case since you can also conceal the water outlets and other elements of the toilet.

Another advantage is that wall-mounted toilets make cleaning easier. Since they're not attached to the floor in any way, cleaning the space underneath is considerably easier.

## WHY SHREE HARI EXPORT HOUSE?

### Durable

**400 Kg. Weight Test**  
All wall hung WC pans and concealed cisterns can hold up to 400 kg.

**Weight Test**  
All seats and covers are subjected to a weight test.

**Open/Close Test**  
All seats and covers are subjected to an open/close test.

**Stainless Steel Hinges**  
Seats and cover hinges are produced out of wear and water-resistant stainless steel.

**Stainless Steel Connection Flexes**  
Connection flexes of wall hung WC pans are produced out of water-resistant and long-lasting stainless steel material.

### Hygienic

**Glazed Duct and Flusher Interior**  
WC pans are dirt-proof, easy-cleaning and hygienic thanks to the glazed surface in duct and flusher.

**Functional Test**  
All WC pans are subjected to a 10-liters functional test.

**Odor Test**  
All WC pans leakage test.

**Easily Removable Seats & Covers**  
Easy to clean thanks to the special hinge.

### Silent

**Soft Close Seats & Covers**  
Soft Close Seats & Covers  
Soft Closing and silent  
Special technology

### Water Conserving

**3/7 Ltr. WC Pans**  
Saves water with 3 Ltr. consumption for half function and 7 Ltr. consumption for full function.

**1 Ltr. Urinals**  
Saves water with only 1 Ltr. of water consumption

Cistern 03

**ONE PIECE TESTED  
BY VACUUM MACHINE**

**WALL HUNG BASIN**

As per shown in the picture, the rag bolt must be grouted into the cement/concrete wall. The bolts must be fixed to the cement/concrete wall. Allow setting & checking than install it using nut and washer.

**COUNTER WASHBASIN**

**At the beginning**

1. A skilled or experienced person should install counter lavatories.
2. Avoid using adhesive with this product.
3. Check the waste area and supply tubing if required.
4. Do not open the lavatory from its protective carton until you are ready for installation.
5. Please follow all local building and plumbing codes.

**MATERIAL & TOOLS**

Measure tape, Keyhole or saber saw, Hammer, Glasses, Rags or Paper toweling, Drill (1/2 dia, drill bit or larger), Pencil, sealant, sharp knife or scissors.

**INSTALLATION OF LAVATORY**

**Please Note :** Please install it in a way that future removal from underneath the counter top is possible without damaging the counter top.

1. Please check the desired location for clearance between the back splash, faucet, Fixture and cabinet.
2. Please cut the template.
3. Please carefully trace the template on the counter top directed.
4. Please mark the faucet hole centerline on the counter top.
5. Please drill a 1/2" pilot on the inside of the cut line.

**For Wood Counter tops:**

1. Mark and per-drill the wood screw holes at the locations shown on the template.
2. Waterproof any exposed areas of wood.

**For Marble Counter tops:**

1. Position the counter top upside down on foam padding to protect the surface. Mark and drill 3/8" holes 5/8" deep at the locations shown on the template.
2. Use a setting tool and hammer to secure the anchors.

**For All Installations:**

1. If the counter top has not been installed, install it at this time.
2. Drill the faucet holes according to the faucet installation instructions.
3. Install the faucet to the counter top according to the manufacture's instructions.
4. Install the drain to the lavatory according to the manufacture's instructions.

## ING GUIDE

ITEM	PROBLEM	PROBABLE REASONS	CORRECTIVE ACTIONS
Wash Basin / Table Top	1. Overflow Chocked and Foul Bed Odor	Waste Coupling used may be full threaded	Waste Coupling should be changed to slot cut coupling
	2. Water Deposit on Tap Platform Area and inside Bowl Area	Basin is not fixed in level or Bracket is not in level	Should be done by Proper leveling
	3. There is no Tap Hole in Basin	Tap Hole could be semi punched from back side	Tap Hole should be created by Plumber from semi punched Area
EWC / Pan / Anglo Indian	1. Water not coming in Bowl Area while Flushing	Flush Bend is not inserted up to the end of Inlet Hole	Insert the Flush pipe up to the end of inlet For Pan Closet; Check whether Flush pipe is not Covering Flush Hole which is in both side of Inlet wall
		Closet / Pan may be not Leveled	Should be done by Proper leveling
One Piece Closet	1. Water not coming in Bowl Area while Flushing	Mechanism Inside tank could not working properly	Change the Center Pump of Mechanism
		There is no water in Flush Tank	Increase the Ball Cock Height to the max level
	2. Water is continuously Leaking Inside the Bowl	Mechanism Inside tank could not working properly	Change the Center Pump of Mechanism
	3. Water quantity Insufficient for effective Flushing	Ball cock Height Adjusted at lower level	Increase the Ball Cock Height to the max level
	4. Uneven Flow of water from both side of closet	Closet is not Leveled properly	Closet should be in Proper level
Wall Hung Water Closet	1. Water not coming in Bowl Area while Flushing	Flush valve may not working properly / Concealed Cistern is not working properly	Should change Flush valve / Concealed Cistern
		Flush pipe is not inserted up to the end of Inlet hole	Insert the Flush pipe up to the end of Inlet
	2. Water is continuously Leaking Inside the Bowl	Closet is not Leveled properly	Closet should be in Proper level
	3. Water quantity Insufficient for effective Flushing	Connection between Closet outlet and Drainage pipe is not proper	Should be done by proper connection by Experienced Plumber
Couple Closet (2 Pcs. Closet)	1. Uneven Flow of water from both side of closet Bowl	Both arm of Diverter pipe not inserted equally in both side of the closet	Both arm of Diverter pipe should be inserted equally in both side of the closet
	2. Water is Leaking between the Cistern and Closet	Diverter pipe not fixed properly in the outlet of cistern	Diverter pipe should be fixed properly in the outlet of cistern
		Rubber Ring containing bolt is not tightened properly	Rubber Ring containing bolt is should be tightened properly

## MAINTENANCE

Like any other part of your house, the bathroom can be made to look great and made to last long if it is taken care of regularly. To make your bathroom beautiful here are some invaluable tips.

**Wash Basin :**

A mild detergent can be used to wash the basin at least once a day. After washing, the basin should be wiped out clearly to avoid water stains.

**Closets:**

Cleanser like Harpic can be used to clear the closet with soft plastic brush, at least once a day.

To avoid minute discoloring, after flushing the toilet give it a once over with the soft brush.

Keep the toilet brush handy in a convenient stand nearby.

In case of toilets and basins, if there has been no maintenance since long period of time, water deposits and discoloration can form on the surface of areas that get wet. In such cases, these stains/marks can be removed with the help of a solution of dilute hydrochloric acid.

Clean with a soft cotton cloth and warm water with soap.

Do not use thinner, day cleaning liquids or powder paste. Use a liquid cleaner at least twice a week.

Use brasso or car rubbing compound and then polish with a cloth to remove fine scratches.

NOTE : \_\_\_\_\_
